Autism Spectrum Disorder (ASD) Assessment & Diagnosis Specialist

Professional Summary

Autism Spectrum Disorder (ASD) assessment and diagnosis specialist with academic training in measurement, diagnosis, and behavior analysis. Experienced in applying assessment tools, supporting rehabilitation activities, and working directly with children and families. Brings strong communication, sign language, multidisciplinary teamwork, and quality control capabilities to accurate, compassionate service delivery.

Professional strengths include:

- Collaborates effectively within multidisciplinary teams
- Communicates clearly with children, parents, work teams, and clients
- Applies sign language when supporting individuals with hearing impairments
- Analyzes behavior and provides accurate recommendations
- Adapts flexibly to different work environments
