Summary

Agricultural Engineer specializing in Plant Production, with knowledge of hydroponic and soilless culture, protected agriculture, water treatment, irrigation systems, and greenhouse climate control. Strong research, analytical, problem-solving, communication, and digital skills, with the ability to adapt to evolving technical environments

Education

Bachelor of Agricultural Engineering (Plant Production)

(2020-2024)

Jordan University of Science and Technology (JUST)

Grade: Very Good

Professional Training & Certifications

Data Entry Training

- Data Entry Training Course | In Progress | 2026

Vocational Training Corporation

- Hydroponic Agriculture Training | In Progress | 2026

Crown Prince Foundation

- Basic Technical Skills for the Labor Market | Jun 2026

Agricultural Engineers Association Training Center

- Vegetable and Fruit Drying | Feb 2026
- Hydroponic Agriculture | Nov 2025

Agricultural Engineers Association Training Center in cooperation with SOS Children's Villages

- Establishment of Protected Agriculture Projects | Dec 2024

King Abdullah II Fund for Development (KAJD) – Jordan University of Science and Technology Professional Development Series:

- Personal and Digital Identity Building Skills | Nov 2024
 - Leadership Skills and Ethical Responsibility | Nov–Dec 2024
 - Water Treatment Technology | Oct–Nov 2024
 - Hydroponics (Soilless Culture) | Aug 2022
-

Core Skills

- **Technical Proficiency:** Crop Management | Plant Physiology | Greenhouse Climate Control | Soil Science | Integrated Pest Management (IPM) | Irrigation Systems
 - **Specialized Systems:** Hydroponic & Soilless Culture | Protected Agriculture | Water Treatment Technologies
 - **Digital Skills:** Microsoft Office (Word, Excel, PowerPoint) | Google Workspace
 - **Professional Skills:** Research & Analytical Thinking | Problem-Solving | Effective Communication | Time Management | Adaptability & Flexibility
-
